

# *AXC In-Line Duct Fans*

# AXC In-Line Duct Fans

Continental Fan's AXC in-line centrifugal duct fans are designed for residential, commercial and industrial ventilation applications. The quiet and efficient backward-curved impeller is capable of developing significant pressure, and the in-line configuration simplifies installation, saving time and money!

## Design Features

- ENERGY STAR® qualified fan models (AXC-ES)
- Quiet, powerful, compact; the most user-friendly fan in the industry
- Exclusive mounting brackets included for simple installation
- 147 cfm - 1400 cfm available, to fit duct sizes from 4"-14"
- 120V operation (also available in 220V; contact factory for details)
- Speed controllable using optional solid state speed control
- Fans are easily installed in flexible or rigid duct
- Fans may be used to supply or exhaust air
- Fans may be mounted in any position
- Heavy gauge, drawn steel housing with baked epoxy finish inside and out
- Suitable for light dust and fumes
- Backward-curved fan impeller:
  - ✓ Operates at low sound levels
  - ✓ Overcomes high static pressure
  - ✓ Will not stall or overload motor at low airflow
- External rotor motor design results in superior motor cooling, durability
- Permanently lubricated ball bearing motors for maintenance free operation
- Automatic reset thermal overload protection for additional safety
- External junction box contains pre-wired capacitor, to simplify wiring
- Fan and motor assembly is precision balanced for quiet and vibration-free operation

For performance and dimensional data, see back page.

## Applications

AXC in-line duct fans can solve many air moving problems. They are designed to boost airflow through long or complex duct runs, and provide ideal solutions for areas that are hard to heat or cool.

**Range Hood Exhaust** (see page 3)

**Bathroom Exhaust** (see pages 4 & 5)

### Duct Boosting

#### Other applications include:

- |                               |                                 |                         |
|-------------------------------|---------------------------------|-------------------------|
| • Residential kitchen exhaust | • Conference room exhaust       | • Principal exhaust fan |
| • Cafeteria exhaust           | • Computer rooms                | • General ventilation   |
| • Hot tub / sauna exhaust     | • Health care facilities        | • Hair and nail salons  |
| • Warm air transfer           | • Humidity and moisture removal | • Powered make-up air   |
| • Spot cooling                | • Equipment cooling             | • HRV/ERV boosting      |

# AXC Range Hood Exhaust

All too often, kitchens can be marred by smoke and odors due to an inefficient range hood. Continental Fan's AXC Range Hood Exhaust Fans provide strong yet quiet exhaust, and can be used to improve the efficiency of an existing residential range hood. AXC fans may be speed controlled with an independent speed controller, or by tying into an existing range hood controller. Rugged, heavy gauge housings have a baked epoxy coating, inside and out, for superior corrosion protection.

In today's energy conscious environment, selecting an ENERGY STAR® qualified range hood exhaust fan assures the highest efficiency and lowest operating cost.

## Design Features

- ENERGY STAR® qualified fan models (AXC-ES)
- Stronger, quieter residential range hood exhaust
- Superior performance over traditional in-hood fans
- Use as principle exhaust fan or as a booster fan
- Remote mounted in-line duct fan design
- See all AXC fan design features on page 2

For performance and dimensional data, see back page.

## Helpful Tips

- Prior to selecting product and materials, consult local building codes.
- A range hood grease filter, commonly found in pre-fabricated hoods, must be used in conjunction with AXC fans.
- AXC fans may be mounted at any angle.
- AXC fan sound levels decrease as the installation distance from the range hood increases.

### How to size a Range Hood Exhaust Fan

The following recommendations follow guidelines published by the Home Ventilating Institute (HVI):

- For a Wall Mounted Range Hood:
  - 100 cfm per foot of hood width
    - ♦ i.e. a 36" range would require a minimum 300 cfm
- For an Island Style Range Hood:
  - 150 cfm per foot of hood width
    - ♦ i.e. a 36" range would require a minimum 450 cfm

Note: Local building codes, as well as any recommendations provided by the range and range hood manufacturers, should be consulted before making a fan selection.

# AXC Bathroom Ventilation

To properly ventilate bathrooms and prevent mold and mildew buildup, a powerful yet quiet exhaust system with the ability to handle multiple venting points is required. Low quality, noisy, ceiling mount bath fans are not capable of providing this. There is, however, a simple solution. Continental Fan's AXC remote mount in-line duct fans provide the strong, quiet and effective exhaust required to meet today's bathroom ventilation needs!

## Design Features

- ENERGY STAR® qualified fan models (AXC-ES)
- Quiet, powerful, compact bathroom ventilation
- Exhaust is two to four times greater than traditional bathroom fans
- Remote mounted in-line duct fan design
- Suitable for direct shower ventilation
- Suitable for use with multiple ventilation points
- Designed to handle long duct runs
- Easy-to-install fan kits
- See all AXC fan design features on page 2

For performance and dimensional data, see back page.

## Bathroom Ventilation Kits

ENERGY STAR® qualified AXC fans are available in a selection of easy-to-install kits.

| ROOM SIZE         | FAN MODEL  | AVAILABLE KITS                                 |
|-------------------|------------|--|
| Up to 100 sq. ft. | AXC100A-ES | RG100-ES; AGK100-ES; RBFK100-ES                |
| Up to 150 sq. ft. | AXC150A-ES | RG150A-ES; AGK150A-ES; DX150A-ES; DXAGK150A-ES |
| Over 150 sq. ft.  | AXC200A-ES | DX200A-ES                                      |

Note: DX kits feature two vents and may be used for two rooms.

## Helpful Tips

- AXC fan mounts easily to attic joists with the exclusive Continental Fan mounting bracket.
- Always use insulated duct in unheated spaces.
- When direct venting a shower, or if noise is a significant factor, use insulated flexible duct to reduce condensation and/or noise levels.
- Add a DFC digital fan control for smart control technology and energy savings.

## DFC Digital Fan Control

The DFC Digital Fan Control uses smart technology to address the requirements of ASHRAE 62.2, and is capable of automatically calculating the airflow required to achieve acceptable indoor air quality. It is designed to provide increased ventilation control that is efficient and affordable. Its unique architecture offers a choice of five distinct modes of operation, allowing the control to be programmed to suit a user's preference and lifestyle.

### Just how much airflow is required?

HVI recommends ventilation rates based on 8 air changes per hour. For most bathrooms this works out to 1 cfm per square foot of area, with a minimum of 50 cfm.

A bathroom less than 100 square feet:

Calculate 1 cfm per square foot of floor area. A minimum of 50 cfm is the required ventilation rate.

A bathroom larger than 100 square feet:

To calculate the proper ventilation rate, add the cfm requirement for each fixture;  
toilet 50 cfm, shower 50 cfm, bathtub 50 cfm, jetted tub 100 cfm.

Note: For proper sizing, the static pressure (SP) needs to be calculated. For typical applications, you may read from the 0.2" SP column for a selection.

# AXC Bathroom Ventilation

## Adjustable Grille Bathroom Ventilation Kits

Attack moisture at its source. Vary airflow to suit your needs. Adjustable Grille Bathroom Ventilation Kits are available with one or two ventilation points.

### RG Kits Include:

AXC-ES Fan, Mounting Brackets, Duct Clamps, GR Adjustable Grille/Collar

- ☐ RG100-ES 147 cfm Fan, 4" Duct
- ☐ RG150A-ES 235 cfm Fan, 6" Duct

### DX Kits Include:

AXC-ES Fan, Mounting Brackets, Duct Clamps, 2 GR Adjustable Grilles/Collars, Y-Fitting

- ☐ DX150A-ES 235 cfm Fan, 6" Duct
- ☐ DX200A-ES 368 cfm Fan, 8" Duct

## AeroGrille Bathroom Ventilation Kits

The attractive, non-adjustable AeroGrille provides superior ventilation when combined with an AXC in-line duct fan. Kits are available for either one or two ventilation points.

### AGK Kits Include:

AXC-ES Fan, Mounting Brackets, AeroGrille AG150-CD, Duct Clamps

- ☐ AGK100-ES 147 cfm Fan, 4" Duct
- ☐ AGK150A-ES 235 cfm Fan, 6" Duct

### DXAGK Kit Includes:

AXC-ES Fan, Mounting Brackets, 2 AeroGrilles AG150-CD, Duct Clamps, Y-Fitting

- ☐ DXAGK150A-ES 235 cfm Fan, 6" Duct

## RBFB Retrofit Bath Fan Kit

Retrofit a noisy and inefficient bathroom fan with an RBFB Retrofit Bath Fan Kit. Kits include all necessary hardware for a simple conversion and installation.

### RBFB Kit Includes:

AXC-ES Fan, Mounting Brackets, 12.5' of 4" Insulated Flexible Duct, 12' of No. 14 AWG Wire, 2 Reducers (4"-3"), 2 Wire Nuts, Wire Cable Restraint, Mounting Screws

- ☐ RBFB100-ES 147 cfm Fan, 4" Duct

# AXC Accessories

## Flexible Insulated Duct

### MODEL DESCRIPTION

|          |   |
|----------|---|
| FL100    | Flexible Insulated 4" Duct - 12.5' Length |
| FL100-25 | Flexible Insulated 4" Duct - 25' Length   |
| FL125    | Flexible Insulated 5" Duct - 25' Length   |
| FL150    | Flexible Insulated 6" Duct - 25' Length   |
| FL200    | Flexible Insulated 8" Duct - 25' Length   |
| FL250    | Flexible Insulated 10" Duct - 25' Length  |
| FL300    | Flexible Insulated 12" Duct - 25' Length  |

## Louvered Shutters (with Tail Piece)

|          |                           |
|----------|---------------------------|
| LS100-4W | Louvered Shutter, 4" Duct |
| LS150-6W | Louvered Shutter, 6" Duct |

## Sound Attenuators

|       |                              |
|-------|------------------------------|
| SA100 | Sound Attenuator, 4" Duct    |
| SA150 | Sound Attenuator, 6" Duct    |
| SA200 | Sound Attenuator, 8" Duct    |
| SA250 | Sound Attenuator, 10" Duct   |
| SA300 | Sound Attenuator, 12.4" Duct |
| SA400 | Sound Attenuator, 16" Duct   |

## Backdraft Dampers

### Spring Loaded Dampers

|        |                            |
|--------|----------------------------|
| BDD100 | Backdraft Damper, 4" Duct  |
| BDD125 | Backdraft Damper, 5" Duct  |
| BDD150 | Backdraft Damper, 6" Duct  |
| BDD200 | Backdraft Damper, 8" Duct  |
| BDD250 | Backdraft Damper, 10" Duct |
| BDD300 | Backdraft Damper, 12" Duct |

### Gravity Operated Dampers\*

|        |                            |
|--------|----------------------------|
| BDD175 | Backdraft Damper, 7" Duct  |
| BDD355 | Backdraft Damper, 14" Duct |
| BDD400 | Backdraft Damper, 16" Duct |

\*Suitable for horizontal or vertical (upblast only) installations

## Protection Guards

|       |                            |
|-------|----------------------------|
| PG100 | Protection Guard, 4" Duct  |
| PG125 | Protection Guard, 5" Duct  |
| PG150 | Protection Guard, 6" Duct  |
| PG200 | Protection Guard, 8" Duct  |
| PG250 | Protection Guard, 10" Duct |
| PG300 | Protection Guard, 12" Duct |

## Mounting Clamps for Rigid Duct (Sold in Pairs)

### MODEL DESCRIPTION

|       |  |
|-------|--|
| MC100 | Mounting Clamps for Rigid 4" Duct (2pc)  |
| MC125 | Mounting Clamps for Rigid 5" Duct (2pc)  |
| MC150 | Mounting Clamps for Rigid 6" Duct (2pc)  |
| MC200 | Mounting Clamps for Rigid 8" Duct (2pc)  |
| MC250 | Mounting Clamps for Rigid 10" Duct (2pc) |
| MC300 | Mounting Clamps for Rigid 12" Duct (2pc) |
| MC355 | Mounting Clamps for Rigid 14" Duct (2pc) |

## Gear Clamps for Flexible Duct

|       |  |
|-------|--|
| GC150 | Gear Clamp for 4" - 6" Duct, Stainless Steel     |
| GC200 | Gear Clamp for 5.5" - 8.5" Duct, Stainless Steel |

## Duct Reducers/Increasers

|           |  |
|-----------|--|
| DRI-04-03 | Duct Reducer/Increaser, 4" - 3" Duct, Plastic      |
| DRI-06-04 | Duct Reducer/Increaser, 6" - 4" Duct, Galvanized   |
| DRI-08-06 | Duct Reducer/Increaser, 8" - 6" Duct, Galvanized   |
| DRI-10-08 | Duct Reducer/Increaser, 10" - 8" Duct, Galvanized  |
| DRI-12-10 | Duct Reducer/Increaser, 12" - 10" Duct, Galvanized |
| DRI-14-12 | Duct Reducer/Increaser, 14" - 12" Duct, Galvanized |

## Wye Fittings

|        |                          |
|--------|--------------------------|
| WYE-04 | Y-Fitting, 4"x4"x4" Duct |
| WYE-06 | Y-Fitting, 6"x6"x6" Duct |
| WYE-08 | Y-Fitting, 8"x8"x8" Duct |

## Roof Caps (Black Plastic)

|       |                                  |
|-------|----------------------------------|
| RC100 | Roof Cap, 4" Duct, Black Plastic |
| RC150 | Roof Cap, 6" Duct, Black Plastic |
| RC200 | Roof Cap, 8" Duct, Black Plastic |

Roof caps include damper, screen and collar

## Wall Caps (Aluminum)

|       |  |
|-------|--|
| WC100 | Wall Cap, 4" Duct, Aluminum, Reducer 4" - 3" |
| WC150 | Wall Cap, 6" Duct, Aluminum                  |
| WC200 | Wall Cap, 8" Duct, Aluminum                  |

Wall caps include spring controlled damper

# AXC Controls

## Digital Fan Control

| MODEL | DESCRIPTION                                     |
|-------|---|
| DFC   | Digital Fan Control 5 Modes of Operation - 120V |

## Thermostat

| MODEL   | DESCRIPTION                   |
|---------|-------------------------------|
| TST120V | Line Voltage Thermostat, 120V |

## Variable Speed Controls (Solid State)

|      |   |
|------|---|
| VSC3 | Variable Speed Control - 3 AMP - 3 Wire |
| VSC9 | Variable Speed Control - 9 AMP - 3 Wire |

## Dehumidistat (for Humidity Control)

|         |              |
|---------|--------------|
| DHS120V | Dehumidistat |
|---------|--------------|

## Digital Timer

|      |   |
|------|---|
| DT60 | Digital Timer 10 - 20 - 30 - 60 Minutes |
|------|---|

## Pressure Switch (with Time Delay)

|         |                              |
|---------|------------------------------|
| PST120V | Pressure Switch w/Time Delay |
|---------|------------------------------|

## Spring Wound Timer

|        |                               |
|--------|-------------------------------|
| CT100V | Spring Wound Timer 0 - 1 Hour |
|--------|-------------------------------|

Face plate not included

## Current Sensor (Solid State)

|         |                                   |
|---------|-----------------------------------|
| CS120AF | Current Sensor, 120V, Solid State |
|---------|-----------------------------------|

## On/Off Switch (with Pilot Light)

|         |                             |
|---------|-----------------------------|
| PLS120V | ON/OFF Switch w/Pilot Light |
|---------|-----------------------------|

## Auto Transformer

|        |                           |
|--------|---------------------------|
| TF120V | Auto Transformer - 90/60V |
|--------|---------------------------|

# AXC Supply & Exhaust Grilles

## AeroGrille Ventilation Grilles

|          |                                     |
|----------|-------------------------------------|
| AG150    | AeroGrille, 6" Duct                 |
| AG150-C  | AeroGrille, 6" Duct, Collar         |
| AG150-CD | AeroGrille, 6" Duct, Collar, Damper |

## Adjustable Ventilation Grilles

|            |  |
|------------|--|
| GR100      | Adjustable Grille, Collar, 4" Duct                   |
| GR150*     | Adjustable Grille, Collar, 6" or 5" Duct             |
| GR200      | Adjustable Grille, Collar, 8" Duct                   |
| GR100-6PK  | Adjustable Grille, Collar, 4" Duct - 6 per Box       |
| GR150-6PK* | Adjustable Grille, Collar, 6" or 5" Duct - 6 per Box |

\* GR150 & GR150-6PK fit standard 6" duct; suitable for 5" duct when used without collar

## Retro Ventilation Grilles

|        |  |
|--------|--|
| RTR678 | Round Grille, Stepped Collar, 6" - 7" - 8" Duct  |
| RTS678 | Square Grille, Stepped Collar, 6" - 7" - 8" Duct |

# AXC In-Line Duct Fans

HVI currently does not have a standard in place for testing the sound of a remote mounted fan. Many factors, such as ducting and fan location, can contribute to sound levels. Generally, a remote mounted fan should be quieter than a typical ceiling mounted fan.

AXC models 355A and 355B are CSA listed to both US and Canadian standards.

Products are HVI certified for airflow and power at 0.2" SP

Fan models ending in -ES are ENERGY STAR® qualified

## Dimensional Data

| MODEL      | D (in.) | d (in.) | a (in.) | B (in.) | WT (lbs) |
|------------|---------|---------|---------|---------|----------|
| AXC100A-ES | 9.5     | 3.9     | 1.0     | 8.3     | 6.5      |

## Helpful Tips

- Rigid duct tends to echo fan noise. To reduce sound levels, use flexible insulated duct (consult local codes before selecting duct type).
- To minimize condensation, use insulated, flexible duct when venting bathrooms or other warm and moist areas.

## How do I know which fan is best suited for my application?

As previously summarized, there are numerous applications where ventilation is required. Whether it is for residential or commercial applications, it is imperative that the proper amount of airflow be calculated.

### Residential

One of our qualified technical support personnel would be happy to assist in selecting a fan for your residential ventilating needs. If you would like to inform yourself further, HVI, the Home Ventilating Institute provides ventilating guidelines for consumers. For more information, visit [www.hvi.org](http://www.hvi.org).

### Commercial

For an application that is commercial or very specific in nature, you may want to enlist an HVAC contractor. For a list of contractors near you, consult the yellow pages.
